

QuickBite - Food Delivery App (USA Market)

Product Requirements Document (PRD)

QuickBite - Food Delivery App (USA Market)

1. Product Overview

Product Name

QuickBite

Product Vision

QuickBite is a mobile and web-based food delivery platform designed to connect customers with local restaurants across the United States. The platform enables users to discover restaurants, place food orders, track deliveries in real-time, and enjoy a seamless ordering experience.

Business Opportunity

The food delivery market in the United States continues to grow as consumers increasingly prefer convenient, on-demand meal delivery services. QuickBite aims to provide a faster, more transparent, and user-friendly alternative to existing food delivery platforms.

2. Problem Statement

Consumers often face challenges when ordering food online:

- Long delivery times
- Inaccurate order tracking
- Hidden delivery fees

- Poor customer support
- Difficulty discovering quality local restaurants

Restaurants also struggle with:

- Limited online visibility
- Inefficient order management
- Customer retention challenges

QuickBite aims to solve these problems by creating a reliable food delivery ecosystem for customers, restaurants, and delivery partners.

3. Goals & Objectives

Business Goals

- Acquire 100,000 registered users within the first year.
- Partner with 3,000 restaurants across major U.S. cities.
- Achieve monthly revenue of \$500,000 within 12 months.
- Maintain customer retention above 60%.

User Goals

- Order food in less than 3 minutes.
 - Receive real-time delivery tracking.
 - Access transparent pricing.
 - Discover restaurants based on preferences and ratings.
-

4. Target Users

Primary Users

Busy Professionals

- Age: 22–45
- Limited time for cooking

- Frequently order meals during workdays

Students

- Age: 18–30
- Budget-conscious
- Prefer fast delivery and discounts

Families

- Age: 30–55
- Order meals for multiple people
- Value convenience and reliability

Secondary Users

Restaurant Owners

- Manage menus
- Receive and process orders
- Track sales performance

Delivery Drivers

- Accept delivery requests
 - Navigate efficiently
 - Earn income through deliveries
-

5. User Stories

Customer Stories

- As a customer, I want to browse nearby restaurants so that I can choose where to order from.
- As a customer, I want to search for specific food items so that I can quickly find what I want.

- As a customer, I want to track my order in real time so that I know when it will arrive.
- As a customer, I want to save favorite restaurants for future orders.
- As a customer, I want secure online payments.

Restaurant Stories

- As a restaurant owner, I want to receive orders instantly.
- As a restaurant owner, I want to update menu items and pricing.

Driver Stories

- As a delivery driver, I want optimized delivery routes.
 - As a delivery driver, I want to see earnings from completed deliveries.
-

6. Features & Requirements

MVP Features

User Authentication

Priority: High

Features:

- Email signup
- Phone number signup
- Login/logout
- Password reset

Restaurant Discovery

Priority: High

Features:

- Search functionality
- Category filters
- Restaurant ratings

- Distance filtering

Menu Browsing

Priority: High

Features:

- Food images
- Item descriptions
- Pricing
- Add-ons and customization

Cart & Checkout

Priority: High

Features:

- Add/remove items
- Apply promo codes
- Delivery instructions
- Order summary

Online Payments

Priority: High

Features:

- Credit cards
- Debit cards
- Apple Pay
- Google Pay

Real-Time Tracking

Priority: High

Features:

- Driver location tracking
- Estimated delivery time

- Order status updates

Reviews & Ratings

Priority: Medium

Features:

- Restaurant reviews
- Food ratings
- Driver ratings

Customer Support

Priority: Medium

Features:

- Live chat
 - Help center
 - Refund requests
-

7. Functional Requirements

User Account Management

- Users shall create accounts.
- Users shall log in securely.
- Users shall update profile information.

Restaurant Management

- Restaurants shall manage menus.
- Restaurants shall receive orders instantly.
- Restaurants shall update item availability.

Ordering System

- Users shall place orders.
- Users shall edit cart items.

- Users shall cancel orders before preparation.

Payment System

- Users shall complete secure online payments.
- System shall generate payment confirmations.

Delivery Tracking

- Users shall track drivers in real time.
 - System shall update delivery status automatically.
-

8. Non-Functional Requirements

Performance

- App load time under 2 seconds.
- Search results displayed within 1 second.

Scalability

- Support 1 million users.
- Handle 50,000 concurrent orders.

Security

- Data encryption in transit and at rest.
- PCI-DSS compliant payment processing.
- Multi-factor authentication support.

Availability

- 99.9% uptime.

Reliability

- Order success rate above 99%.
-

9. Success Metrics (KPIs)

Customer KPIs

- Monthly Active Users (MAU)
- Daily Active Users (DAU)
- Average Order Value (AOV)
- Customer Retention Rate

Operational KPIs

- Average Delivery Time
- Order Completion Rate
- Customer Satisfaction Score (CSAT)

Business KPIs

- Monthly Revenue
- Number of Partner Restaurants
- Customer Acquisition Cost (CAC)
- Lifetime Value (LTV)

Year 1 Targets

- 100,000 registered users
 - 2,000 restaurants onboarded
 - 50,000 monthly orders
 - 4.5+ average app rating
-

10. Assumptions & Constraints

Assumptions

- Users have smartphones and internet access.
- Restaurants are willing to join the platform.
- Delivery drivers are available in launch cities.

Constraints

- Initial budget: \$750,000
 - MVP launch within 6 months
 - Launch limited to selected U.S. cities
 - Compliance with payment regulations
-

11. Risks

Business Risks

- Strong competition from existing platforms.
- High customer acquisition costs.

Technical Risks

- GPS tracking inaccuracies.
- Payment processing failures.

Operational Risks

- Driver shortages during peak hours.
- Delayed deliveries.

Regulatory Risks

- State-specific labor regulations.
 - Data privacy compliance requirements.
-

12. Out of Scope

The following features will not be included in Version 1:

- Grocery delivery
- Drone delivery
- International expansion
- Cryptocurrency payments

- Voice ordering
- Subscription meal plans
- AI meal recommendations

These may be considered in future releases.

13. Timeline / Roadmap

Phase 1: Discovery & Research

Duration: Month 1

Activities:

- Market research
- Competitor analysis
- User interviews
- Requirement gathering

Phase 2: Design

Duration: Month 2

Activities:

- Wireframes
- User flows
- UI/UX design
- Prototype testing

Phase 3: Development

Duration: Months 3–5

Activities:

- Mobile app development
- Backend development
- Payment integration

- Restaurant dashboard development

Phase 4: Testing

Duration: Month 6

Activities:

- QA testing
- Security testing
- Performance testing
- Beta launch

Phase 5: Launch

Duration: End of Month 6

Activities:

- Production deployment
- Marketing campaigns
- Restaurant onboarding

Future Releases

Version 2:

- AI-powered recommendations
- Loyalty rewards program
- Scheduled deliveries

Version 3:

- Grocery delivery
- Subscription memberships
- Advanced analytics for restaurants
